

## A Look At The Ccleaner Program.

Are you tired of your computer crawling along like a tortoise on a slow, lazy day? Most general computer users have no idea how to perform simple maintenance on their machines to keep them running faster and smoother. The ccleaner does all of this for you in the blink of an eye.

Is your computer running much slower then when you first brought it out of the box and set it up? Have you ever cleared your temporary internet files? If not then doing so will almost make your machine run like new.

With the new age of online tracking programs out there its very important to keep your cookies cleared so that your stored information is not sitting there waiting for an online predator to strike. You choose who gets what information and when.

Clearing the web history is invaluable when you have a shared computer and you really don't care for everyone knowing where you have been surfing. It's a valuable tool in the world of privacy.

Keeping your Registry in top notch shape for performance is vital to your computer's health. Not doing so can lead to an early grave for it.

The Registry is like the heart of your computer, excess items sitting in there are like clogged arteries to our own hearts. It leads to slower performance and annoying error messages. Not keeping your Registry cleaned can lead to fatal crashes and you will end up having to have someone reformat your hard drive or worse, purchasing a new computer.

The majority of software that you add to your machine will leave little pieces of itself laying around the Registry and Program files on your computer once you uninstall them. Most people dont know that, and it can cause serious lag in the way your computer runs.

Do you get tired of every little program you install ending up on the Startup menu of your computer and wanting to load every time you start your computer? CCleaner can also clean up the Startup menu so that you don't have a million programs all trying to start at once. This can seriously make for a very slow startup time.

CCleaner take the headache out of routine computer maintenance. In the time it will take for you to do all of the maintenance this one program will do for you you could be making a home cooked meal, heading to the gym for a good workout or watching a movie with you kids!
