

Disadvantages of Barcode Scanners

We hear the statement "disadvantages of barcode scanners" from time to time and that we canvass customers believe that what we encounter a common theme. Most customers who believe there are disadvantages of barcode scanners are customers who are not using them and retain a well managed system manual in place because it works for them.

Many manufacturers and distributors continue to manage inventory log sheets and with the systems of index cards. It was a proven method for years, but today in the world of speed and work free of errors, you should not rely on your employees always get the number right. The advantage to scan the bar code that is read what is there. There is no way to the scanner may transpose numbers or recognize the number 0 as a letter or a number No. 1 with a letter l. There are many elements of human errors that lead to the duplication of work because of errors and scan the bar code avoids the errors of transposition and misread the number of characters and letter.

Now, the drawbacks of barcode scanners are typically viewed as costs change, and environmental sustainability severe that customers may think, there is no way we can automate. Well, lets look at each problem at a time.

The disadvantage of a Bar code scanner because of the costs is a real easy to tackle. Costs have actually decreased in both inventory management software and hardware to scan bar codes. Depreciation in the time saved due to an error free work and the speed with which stocks and cycles can be made can provide a return on investment within 3-4 months. Not bad!

The disadvantage of barcode scanners when it comes to changing the listing is to change the workplace. Most organizations that have been active for many years have really changed their processes and have many employees who have been trained and know how to present things. Well, to adapt to the competitive nature of the business, the change must be part of the plan. Adding capacity scanning bar code that is not really a big change. If you think about it, the scanner actually writing the data to the worker. So, it really does not change much, it makes the process easier and more generally embrace employees. Really, who likes to tout his right hand anyway?

Now, we are at the last issue of sustainability as a disadvantage of barcode scanners. Today, barcode scanners are designed for all types of industrial environments in libraries for steel mills. Disadvantages No Bar code scanner here. If sustainability is what you want, take a look at the work that has been in existence for over 10 years. It is the Quick Scan 6000, now replaced by the QS3800. This scanner is known as the Hammer! Over the years, he was overthrown by forklifts, scales fell from the top, covered in ashes, and he still scanning. There are many new models in today's marketplace, but it is an example of sustainability in a scanner for barcode.

So now I ask, what are the disadvantages of barcode scanners? If you have any thoughts that are not covered here, please let us know. We are very interested in hearing from you.
